Ridge, Fence, or Other Physical Feature	—	Inset Area	A
Property Line or Forest Line	—	Outside Subject Area	—
Nonvisible Boundary or Feature Not Elsewhere Classified	—		

Where international, state, and county boundaries coincide, the map shows the boundary symbol for only the highest-ranking entity.

¹ A '*' following a place name indicates that the place is coextensive with a MCD; the place name is preceded by a 'C'. A '*' following an incorporated place name indicates that the place is also a MCD; the place name is preceded by an 'I'. The place name is preceded by an 'A' if it is a consolidated city within the subject entity; nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on the boundaries of the tribal census tract. If a tribal census tract crosses state or county boundaries, the same tribal census tract number may be assigned to both sides of the boundary and, if so, constitutes a single tribal census tract entity.

² A '*' following a block number indicates that the block number is repeated elsewhere in the block.

ENTITY TYPE: American Indian Reservation
NAME: Reno-Sparks Colony (3130)
ST: Nevada
